TURN OUT NEW CONSUMERS' GOODS  
PRODUCTION EQUIPMENT

PLANT PUTS OUT NEW TEXTILE MACHINES -- Vechernyaya Moskva, No 7, 9 Jan 50

The Moscow Plant imeni 1 May has begun production of silk-winding machines which will increase the output and improve the quality of raw silk. The plant is also to begin production of newly designed silk-spinning machines and similar machines for other textiles.

In January the plant will put out the first series of an attachment for weaving looms, by means of which breaks in the thread will be quickly discovered and repaired. It will also turn out several improved models of bobbins during 1950.

Vechernyaya Moskva, No 293, 13 Dec 49

The Plant imeni 1 May has built a new silk-spinning machine, the Sh-1, which spins both natural and artificial silk. The machine has already passed tests successfully and has shown itself to be  $1\frac{1}{2}$  times more productive than present day machines.

TEXTILE-MACHINERY PLANT MAKES NEW MODELS -- Pravda Vostoka, No 13, 17 Jan 50

The Tashtekstil'mash Plant manufactures new equipment for the textile industry throughout the country. The first samples of machines for wet-spinning of yarn and a fine-roving machine for manufacturing yarn of high count have come off the assembly stand.

NEW SHOE MACHINE SAVES LASTS -- Leningradskaya Pravda, No 250, 22 Oct 49

The Plant imeni F. Engels has put out a machine which secures uppers to shoe welts with clamps instead of nails as was formerly done. The

productivity of the machine is twice that of the old ones, and the lasts, which wore out rapidly when nails were used, have been given longer life.

The machine has successfully undergone factory tests and is now being set up in the Skorokhod Factory.

Sovetskaya Kirgiziya, No 237, 4 Dec 49

The Plant imeni Engels has just released a series of new machines for sewing-in shoe welts. They can process 1,000 pairs of shoes during a shift.

NEW MACHINES TO AID FOOD INDUSTRY -- Vechernyaya Moskva, No 5, 6 Jan 50

The Machinery Plant imeni Yaroslavl' has begun production on a new press which should considerably speed up sugar-beet processing. Two other machines are scheduled for production, one to be used in making rose wine: it is capable of producing over 6,000 bottles per hour; the other, a machine for cutting and stamping industrial and toilet soap.

TEA, WINE, TOBACCO INDUSTRIES GET NEW MACHINERY -- Zarya Vostoka, No 8, 12 Jan 50

Since the beginning of the postwar Five-Year Plan, the Tbilisi Machine-Building Plant imeni Ordzhonikidze has not only brought its level of production up to the prewar level but has gotten 34 new types of tea, winery and tobacco machinery into production.

The plant has pledged the completion of its first-quarter plan by 12 March. The Five-Year Plan itself was completed in 3 years, 11 months.

PRODUCE FOOD-PROCESSING MACHINES -- Trud, No 7, 8 Jan 50

The Rostov Machine-Building Plant of the Glavpishchemash (Main Administration of Food-Processing Machines) has produced an improved press for making macaroni and a jar-washing machine.

DESIGN FRUIT-PACKING MACHINE -- Zarya Vostoka, No 226, 18 Nov 49

A new machine for wrapping and packing citrus fruit has been designed by engineer Ye. Rollov. An experimental model of this machine is now in production at the Batumi Machine-Building Plant imeni Beriia. It will pack 120,000 pieces of fruit in 8 hours.

APPROVE PLAN FOR REFRIGERATION INSTALLATIONS -- Moskovskiy Bol'shevik, No 8, 10 Jan 50

The Ministry of Trade USSR has approved the 1950 - 1954 plan for the installation of refrigerating equipment in commercial enterprises and public food-dispensing institutions. By way of priority, the stores, warehouses, restaurants, and dining-rooms in the coal and petroleum areas, which are situated near metallurgical enterprises will be so equipped.
